My vision for a sustainable school is...

A school where sustainability is a shared value, guiding students, teachers, and families in daily habits and long-term initiatives. From waste sorting and urban gardening to student leadership through the Eco-Committee, we cultivate a sense of responsibility and global citizenship.

My Green Action Plan, formulated SMART:

Specific

Implement a year-round sustainability program led by students and teachers, including projects like: **Mobility Week**, **Zero Waste Week**, **Gardening**, **Biodiversity activities**, and **Noise Monitoring**.

Measurable

At least 60% participation in green events, 40% reduction in non-recyclable waste, 25% energy savings, and student tracking of environmental indicators.

My Green Action Plan, formulated SMART:

Achievable

Use existing resources, engage parents and local partners, leverage student creativity and leadership via the Eco-Committee.

Eco-Committee

Supports our whole-school vision of sustainability, links directly to SDGs (Sustainable Development Goals), promotes well-being and community responsibility.

Realistic

Eco rules

Time-bound

Implemented from September 2025 to June 2026, with monthly reviews and final community presentation in June.

This plan links to the Sustainable Development Goals:
