

# Sustainable Building Sustainable Curriculum

Natálie Buriánová  
Scioškola Praha Holešovice  
students 6 - 15 years old

Funded by the European Union. Views and opinions expressed are however those of the author(s) only and do not necessarily reflect those of the European Union or the European Education and Culture Executive Agency (EACEA). Neither the European Union nor EACEA can be held responsible for them.

Co-funded by  
the European Union

**waste = challenge** Europe is expected to face over the next 10 years

**education** systems treat **climate/ecology** as **optional**

**My vision of a sustainable school is...**

the school with sustainable building and with  
sustainability integrated as a core  
competence in curriculum

## My Green Action Plan, formulated SMART:

### **Specific**

- Integrate Sustainability into the School Curriculum (linked to subject "I co-create the future of the world") to upbringing sustainable citizens from our students and teachers/team alike
- Create sustainable environment in our school

### **Measurable**

We know we've been successful by reducing waste in our school, having fully-equipped Science lab, organizing three conferences and successfully piloting new School Curriculum

### **Achievable**

- Sustainability projects (workshops on Waste cycle (in collaboration with eco-company Kokoza), visit of the waste incineration plant, organizing cleanups of the local streets and parks, composting, community gardening, CurioSoil)
- Sustainable school building - solar panels, waste separation, less waste, cleaning company that employs people with disabilities/special needs, ecological cleaning products
- Conference /festival Sustainable School (to inspire other schools and attract stakeholders and policymakers) + reports and articles
- New Curriculum (with National Pedagogical Institute of the Czech Republic)

## **Realistic**

- + The plan aligns with our school's vision and with our new curriculum
  - + Science sub-team
  - + Teachers educations
- + Cooperation with sustainable organizations
- + our own Research institute to help evaluate
  - + Erasmus+

## **Time-bound**

- By the end of school year 2025/2026 our school will have less waste than at the beginning of this Action Plan (September 2025)
- By the end of school year 2026/2027 we will have fully-equipped Science lab
- By the end of school year 2026/2027 we will have successfully piloted our curriculum with sustainability embedded in its subjects
- By the end of school year 2027/2028 we will have successfully organized 3 conferences/festivals on Sustainable School

základní  
**scioškola**  
Holešovice

  
**SYNAPSES**

## This plan links to the Sustainable Development Goals:

Over **2 000 000 000 tons of waste** are thrown away every year

Waste influence on Triple planetary crisis:

- Transporting, processing and disposing of waste generates gases that contribute to **climate change**
- Pollution of land and aquatic ecosystems → **biodiversity loss**
- People die as a result of **diseases** related to mismanaged waste
