Vocational High School

SYNAPSES

Co-funded by
the European Union

I will implement my scenario in: 1st grade

The duration of the implementation is: 21 hours

My scenario goals are:

How will I achieve my educational goals?

1. Understanding the waste of resources in the existing economic system, i.e. the linear economy.
2. Familiarity with the alternative economic model of the Circular Economy, as well as with basic concepts such as the Product Life Cycle, the recovery of Natural Resources, etc.
3. Familiarity with the Design Thinking methodology.
4. Practice the skills of presenting an idea.

Through 6 lessons we will explore the alternative economic model of the Circular Economy
1st lesson: Initial investigation of Circular Economy Model
2nd lesson: Circular Economy business models in practice
Natural Resource Recovery & Circular Procurement
3rd lesson: Product as a Service & Sharing Platforms
4th lesson: Extending product lifespan
5th lesson: Basic Economic Concepts
6th lesson: Your own Circular idea
In the end of the project there will be an online meeting of all schools participating in the program where each school will present its project.

SYNAPSES

This activity links to the Sustainable Development Goals:

The green competences that promoted from my scenario are:

Embodying Sustainable Values	Valuing Sustainability		Promoting Nature
Embracing Complexity in Sustainability	Systems Thinking	Critical Thinking	Problem Framing
Envisioning Sustainable Futures		Adaptability	Exploratory Thinking
Acting for Sustainability		Collective Action	Individual Initiative

SYNAPSES

I collaborate with:

- NGO SciCo (Science Communication) who trained the teachers and gave us all the educational material

- all schools participating in the program

Here is my plan for integrating this scenario in my school this year:

I implement this scenario within the context of the lesson of Creative Activities Zone (3 hours per week) at the 1st Grade

Thank you
